Operational evidence

The club perimeter is unchanged at 20. December departures are 5,434 out of 98,800 opening members; new joins are 2,500. The dues denominator is recognized and billed dues for that month, excluding other services. Current-month cleared receipts are 90% of that denominator. Arrears recovered relate only to opening receivables and must not be added to the current collection-rate numerator.

The overdue amounts are assumed collectible; no impairment or write-off has been recorded. Management has not established whether lost members overlap with failed payments. There were no price changes, annual fees,

ownership changes or new clubs. December club costs include temporary staffing and utilities; central costs include an extra \$0.0525m campaign expense. There are no EBITDA add-backs. The external panel does not prove what caused these local observations.

Cash, interest and actual LTM components

Total bank cash on December 31 is \$7.818772m, of which \$1.0000m is restricted. The finance officer learned the finalized operating results on January 15 at 9 am. This January 19 delivery also serves as the C04 operating notice. No lender default notice, amendment or waiver had been issued by this cutoff. Debt remains \$18.0000m. Scheduled interest was paid on November 30 and December 31. Cash taxes follow the original installment calendar, separately from income-tax expense.

January-September 2026 actual components: revenue \$24.750000m, royalty expense \$1.732500m and other operating costs \$18.067500m. Add October from 06 and November-December above for the complete actual LTM schedule. No add-backs are approved. The lender must apply C02 using these actual components and eligible cash.

Initial thirteen-week forecast and action plan

The January 15 forecast assumes slower dues collection, elevated operating costs and \$1.6m of already-contracted club equipment refurbishment payments through April. It assumes no new debt, equity or payment deferral. Projected week-end Unrestricted Cash is below. Each amount already excludes restricted cash and includes operating payments, interest, cash tax and capital expenditure. Initial activity from January 1 is included; the schedule starts from the latest observed December balance. The report delivers the forecast under C05. Forecasts are not bank balances.
