Forecast date and purpose

Prepared by the fictional treasury team February 25 and delivered February 26, 2027 at 10 am New York time. This is a focused cash forecast incorporating report 10, not a full monthly income statement. It continues the February 12 forecast in report 09 and incorporates only information available by February 25.

Receipts, payments and funding assumptions

Facilities report PLNT-FAC-0216, received February 16, identifies urgent ventilation and water-damage repairs at five existing clubs. Accepted repair orders dated February 17 require \$0.5m on March 12 and \$0.5m on April 9. These are ordinary repairs to existing sites, not new-club expansion. The costs and cash payments were absent from report 09. Management treats them as operating expense with no EBITDA add-back; cash-tax installments remain unchanged in this forecast.

A signed fictional landlord reimbursement confirmation, PLNT-LAND-0218, provides \$0.8m payable on June 18 after these repairs. It is a future receivable, not current eligible cash. The \$1.2m equipment payment deferred to May 28 in report 09 remains payable on that date and is included once in the extended forecast. The earlier thirteen-week forecast ended May 14 and did not show that outflow.

Contractors require the stated payment dates to maintain the repair schedule. The equipment vendor declined a further deferral on February 18. Management has included the prior campaign cancellation and collection improvement; neither can be counted again. No additional finance or owner contribution is committed.

All other forecast receipts, fees, operating costs, interest, estimated cash-tax installments and capital expenditure assumptions remain as in the comparison schedule. The prior operating mitigations are already included. No new financing, owner contribution or discretionary expansion is assumed. Estimated earnings, receivables and supplier advances are kept separate from cleared bank cash. Amounts below are USD millions.

Thirteen-week cash forecast

The cash reduction is cumulative at each date, not a separate deduction to be added every week. Revised cash equals comparison cash less that cumulative reduction. May 21 is a new continuation estimate, not a number from report 09. The comparison assumes the original cash timing. The earlier dates reproduce report 09 exactly.

Week ending	Comparison cash	Cumulative reduction	Revised cash
2027-02-26	6.8000	0.0000	6.8000
2027-03-05	6.7500	0.0000	6.7500
2027-03-12	6.7000	0.5000	6.2000
2027-03-19	6.6500	0.5000	6.1500
2027-03-26	6.6200	0.5000	6.1200
2027-04-02	6.6000	0.5000	6.1000
2027-04-09	6.7000	1.0000	5.7000
2027-04-16	6.8000	1.0000	5.8000
2027-04-23	6.9000	1.0000	5.9000
2027-04-30	7.0000	1.0000	6.0000
2027-05-07	7.1000	1.0000	6.1000
2027-05-14	7.2000	1.0000	6.2000
2027-05-21	7.3000	1.0000	6.3000

Month-end continuation and timing

The following continuation estimates were prepared February 25 for the calendar dates shown. They are forecasts, not bank statements. The April 30 balance agrees with the weekly schedule.

Month-end	Comparison cash	Cumulative reduction	Revised cash
2027-02-28	6.7800	0.0000	6.7800
2027-03-31	6.6100	0.5000	6.1100
2027-04-30	7.0000	1.0000	6.0000
2027-05-31	6.2000	1.0000	5.2000
2027-06-30	6.5000	0.2000	6.3000

For May 31, continuation cash before the existing equipment payment is \$7.4m; subtracting the \$1.2m May 28 payment gives the \$6.2m comparison base, then \$1.0m repairs gives \$5.2m. June's cumulative repair effect is \$1.0m paid less \$0.8m reimbursement, or \$0.2m. The February 25 continuation forecast gives June cash of \$6.5m before that net effect, or \$6.3m after it. These later dates extend beyond report 09.

No later actual result is embedded in these estimates. The last finalized month-end supplied here remains January 31. Future operating receipts and the stated counterparty payment dates remain sources of uncertainty.
