Measurement and delivery

Cash measurement date: May 31, 2027. Prepared and delivered 2027-06-01 at 10 am New York time, after treasury received the month-end bank statement at 9 am that day. The displayed bank figures are actual cleared balances. The outlook section is a separate management forecast. This focused treasury supplement does not purport to be a complete monthly income statement or a trailing-twelve-month earnings schedule.

Payment evidence and actual bank position

Contractor receipts confirm \$0.5m paid March 12 and \$0.5m paid April 9. Facilities staff accepted the completed ventilation and water-damage repairs on May 14. These are repairs at five existing clubs; the operator still has twenty clubs. The \$1.2m equipment payment was made on May 28, as agreed in the earlier vendor deferral. That payment is separate from the \$1.0m repair expense.

The May 31 bank statement records \$6.2m of cleared cash, including the unchanged \$1.0m restricted reserve. Cash freely available for operating obligations is \$5.2m. The \$0.8m landlord reimbursement remains receivable and has not entered the bank account. Debt remains \$18.0m. Monthly interest of \$0.135m was paid May 28, the last Business Day under the scenario calendar.

Cash bridge - USD millions

Other net cash includes dues and arrears collected, other operating receipts, ordinary operating costs, interest, cash tax and routine capital expenditure. It excludes the separately shown repair and equipment payments. The repair expense is not added back to earnings. The reimbursement is not counted until received.

Month-end	Opening cash	Other net cash	Repairs paid	Equipment paid	Closing cash
2027-02-28	6.9190	-0.1390	0.0000	0.0000	6.7800
2027-03-31	6.7800	-0.1700	0.5000	0.0000	6.1100
2027-04-30	6.1100	0.3900	0.5000	0.0000	6.0000
2027-05-31	6.0000	0.4000	0.0000	1.2000	5.2000

Opening cash plus other net cash movement less the separately identified cash reductions equals closing cash. Values use full precision before display rounding. The final bank reconciliation is \$6.2000m total cleared cash less \$1.0000m restricted deposits, leaving \$5.2000m freely available for operating obligations. No other entity's funds, inventory, receivables or undrawn facilities are included.

Remaining obligations and updated outlook

The landlord accepted the repair evidence and reconfirmed payment of \$0.8m on June 18 in a notice received May 27. The forecast of \$6.3m June cash consists of \$5.2m May cash, \$0.3m net ordinary cash generation and that \$0.8m receipt. If the reimbursement misses June 30, forecast June cash is \$5.5m. The receivable is not already available cash.

There is no further supplier deferral, new financing or committed owner contribution. Earlier campaign savings and collection improvement are already reflected in the cash results and cannot be used again. Management continues to track dues collections and costs at the existing twenty clubs; no new sites or increase in member pricing is assumed in this forecast.

Future month-end	Forecast freely available cash
2027-06-30	6.3000
