

04 Opening Financial and Operating Schedules

Document YETI-04 | Available 2026-10-01
Prepared by Fictional borrower finance team

SYNTHETIC DEMO. YETI Demo Outdoor Products LLC and Scenario Lender Y01 are invented. No affiliation, financing or guarantee by YETI Holdings, Inc. is asserted. All financial figures, terms and scenario events below are fictional.

Basis and opening balance sheet

All figures are synthetic. USD millions unless stated. Calendar-month model from October 2026 through March 2027. No later observations are included. The editable workbook has the same 04 classification. This is a simplified management model, not audited reporting.

Opening item	USD millions
Unrestricted bank cash	20.000000
Restricted reserve	2.000000
Trade / membership receivables	10.000000
Inventory at landed cost	24.000000
Net fixed assets	30.000000
Total assets	86.000000
Operating payables	8.000000
Debt	50.000000
Equity	28.000000
Liabilities and equity	86.000000

Pre-funding bank cash is \$12.0000m. Receive \$50.0000m and refinance \$40.0000m to reach closing bank cash. No fees or distributions occur. Opening income-tax payable is zero.

Actual trailing twelve months through September 2026

Historical item	USD millions
Revenue	240.000000
Landed COGS	144.000000
Other operating costs	60.000000
EBITDA	36.000000
Depreciation and amortization	4.800000
Historical interest	4.500000
Pretax income	26.700000
Income tax	6.675000
Net income	20.025000

These invented historical observations are independent of future editable drivers. For the later December LTM schedule, January-September actual components are 75% of each annual revenue and operating-cost line, giving EBITDA of \$27.0000m. Historical interest is the prior facility's expense; new-facility interest follows C00.

Monthly forecast inputs

Driver	Base value
Net sales	20
Landed COGS / sales	60.00%
Inventory purchases received	12
Customer cash collections	20
Other operating expense	5
Depreciation and amortization	0.4
Capital expenditure	0.6
Income tax rate	25.00%

Cash collections and inventory purchases are separate inputs from revenue and COGS. Receivables roll by sales less collections; inventory rolls by purchases received less COGS. All purchases are paid in the same month, leaving operating payables unchanged. All depreciation is presented below EBITDA; unlike the real-company accounting, it is not allocated to the scenario COGS line.

Six-month base forecast

Measure	Oct 26	Nov 26	Dec 26	Jan 27	Feb 27	Mar 27
Revenue	20.000000	20.000000	20.000000	20.000000	20.000000	20.000000
EBITDA	3.000000	3.000000	3.000000	3.000000	3.000000	3.000000
Closing Unrestricted Cash	21.468750	22.937500	24.406250	25.875000	27.343750	28.812500
Closing receivables	10.000000	10.000000	10.000000	10.000000	10.000000	10.000000
Inventory at landed cost	24.000000	24.000000	24.000000	24.000000	24.000000	24.000000

Statement reconciliation

Income tax expense is 25% of positive pretax income. Cash-tax installments follow the fixed \$0.556250m monthly origination schedule; any difference accumulates in tax payable or receivable. Fixed assets change by capital expenditure less depreciation, and equity by net income. No dividends, extra borrowings or unlisted cash flows are assumed. The workbook reconciles cash, working capital and the balance sheet in each month. Forecast cash is not a C01 actual measurement; C02 requires actual LTM EBITDA.
