

Historical replay shows mixed performance

Original loan terms + sequential public reports. Actual amendments withheld from model inputs.

RealityCheck Direct Nemotron review 3 companies / 27 checkpoints per workflow

HISTORY	Warranted reviews detected Higher is better		Unnecessary escalations Lower is better		Recorded model time Successful calls only	
iRobot / Carlyle R01 / DEVELOPMENT		2/5		1/2	27.2 min 5.2 min	5.2x RC / direct
RumbleOn / Oaktree R02 / DEVELOPMENT		4/4		1/1	16.0 min 3.9 min	4.1x RC / direct
PetIQ / Ares R03 / UNSEEN HISTORY		1/4		1/5	23.3 min 9.6 min	2.4x RC / direct
All histories POOLED; INCLUDES DEVELOPMENT		7/13		3/8	66.6 min 18.7 min	3.6x RC / direct

Unseen history: equal detection; one fewer unnecessary escalation; 2.4x as much model time.

Detected = package review or information request. Unnecessary escalation = package review at an unwarranted checkpoint.
PetIQ was frozen before its first model run. Labels are AI-author-prepared with lender-history knowledge; no independent credit review.
6 unresolved reference checkpoints excluded from scoring. Scoped clauses; one run per checkpoint. No stability study. Time excludes setup, controls, review and replaced failures.
